AUTHORISED ITEMS for SEWER SYSTEM

Inspection Point Openings Information

All Authorised components listed for the construction of inspection point openings assemblies are in accordance with SA Water Standard Specifications, which cover each specific item used setting out all of SA Waters manufacturing performance requirements to ensure an adequate performance and long life.

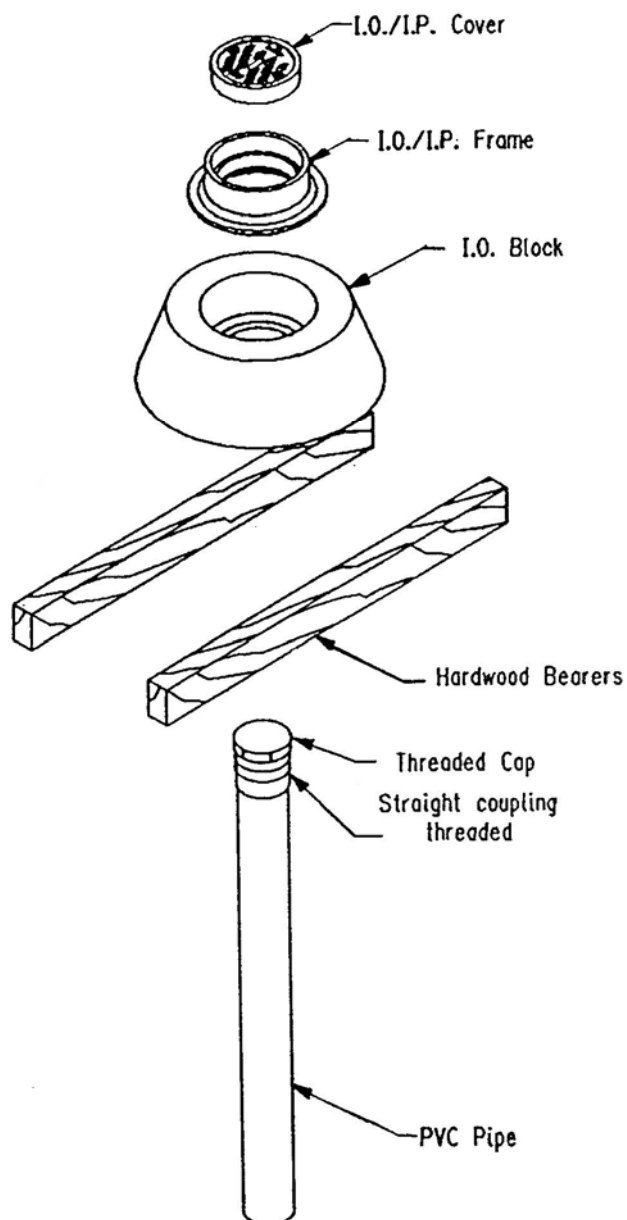

The figure on page 5 - 2 illustrates the typical arrangement for a standard inspection point/opening assembly and identifies the names of the components

NOTE: Some suppliers may offer Package Assemblies, but items are listed separately to allow purchase of the most appropriate components

Applicable Corporation Standard Specifications
