

Design a Sustainable City Competition 2016

Create your own sustainable city and submit your design to win!

Create it in Minecraft, graphic design software, build a model or draw / paint it by hand – the choice is yours!

Sustainability in cities is about making sure we have enough resources, housing, jobs and facilities to keep the city functioning well and the people happy now and into the future. Using renewable sources and recycling is essential to the health of our planet.

Rules

1. Design criteria

- You need to design a city for a population of 100,000 people.
- Your design can be created using computer programs (think **Minecraft, Publisher, InDesign**), **physical models** or **hand drawn**.
- The people will need access to safe clean water, sewerage, energy sources, food supplies, housing, health services, shops and education facilities. You will also need to create industries that provide jobs for people, think about how you will make sure people are safe, and provide services for recreation and entertainment.
- Consider how you will manage the waste / rubbish in your city? How much can you recycle?

2. Submission criteria

Your competition entry must include:

1. The design:

This can be submitted in PDF, JPG Screenshots, photographs, a power point presentation or a video – be creative!

2. A written explanation of the design features of your city in Word or PDF format.

Alternatively you may send printed copies of your design and explanation. Please do not send physical models. Photograph of the model will suffice.

Send your completed entries to brainwave@sawater.com.au or SA Water Community Relations Team, Level 6, 250 Victoria Square, Adelaide, SA, 5000

Entries close 5pm, Friday 2nd September 2016.

Entries will be judged based on how well they demonstrate understanding of sustainable development.

Winners will be announced during National Water Week, 16-22 October 2016.
